

US LHC Accelerator Research Program
bnl - fnal- lbl - slac

**LARP/LHC Beam Commissioning
Expression of Interest**

The LHC Accelerator Research Project (LARP) is a multi-laboratory effort to foster US involvement in the Large Hadron Collider project at CERN. LARP is committed to being a presence for LHC Beam Commissioning scheduled to begin in 2007. At this time effort is underway to define interests and capabilities of US accelerator experts and link them into the Commissioning organization for the LHC. Beam Commissioning work may involve travel to CERN and/or remote effort from the US.

This document serves only as an expression of interest. Receipt of same in no way guarantees nor commits one to a role in this effort.

*Kindly complete and return the form below to aid us in formulating
the US LHC commissioning team*

Name _____

Address _____

Phone _____

Email _____

Affiliation _____

Department/Organization _____

Current Position/Duties

Past Beam commissioning/Operational experience

Areas of Interest

Fraction of time available

Availability for visits to CERN (length of stay, beginning date)

Unique abilities you can bring to this effort

Please return completed applications to/for questions please contact:
